### SUMMARY

Results-driven Full-Stack Laravel Developer with 2.5+ years of experience building secure, scalable, automation-focused web applications across finance, HRMS, logistics, manufacturing, and compliance domains. Started as an intern at BWJ Tech Solutions and progressed to Team Lead through strong performance and leadership. Skilled in end-to-end product ownership, from client communication and requirements to development, deployment, and support. Focused on solving real-world problems through automation, reducing manual effort by 50–80%. Experienced in integrations including SAP, biometrics, OCR, WhatsApp/SMS gateways, Azure AD, and REST APIs. Passionate about delivering efficient, user-friendly systems that enhance productivity, reduce errors, and scale reliably across organizations.

• <b>Class 12</b> – Science (PCM)	R. N. T. S. College, Sitamarhi	74.6%	2017 – 2019
• <b>Class 10</b> – General Studies	Dolphin Public School, Muzaffarpur	8.4/10	2016 – 2017

### CERTIFICATIONS

• Web Technology	HIIT, Muzaffarpur	A	Oct 2022 – Mar 2023
------------------	-------------------	---	---------------------

### SKILLS

- **Web Technology:** Laravel, HTML, CSS, jQuery, Bootstrap, PHP, PhpMyAdmin, Git, cPanel,
- **Soft Skills** : Quick Learner, Smart Working, Good Communication, Adaptability

### Experience

- **Internship** PHP Developer Intern BWJ Tech Solutions Hyderabad Mar 2023 – May 2023
  - Learned various web development tools and their implementation in real-life projects,
  - Acquired knowledge of the Laravel framework and other web technology.
  - Assisted senior developers in various projects, gaining practical experience in professional development workflows.
- **Employment** Full Stack Laravel Developer BWJ Tech Solutions Hyderabad June 2023 – Current
  - Developed and maintained web applications using Laravel and associated technologies.
  - Ensured timely delivery and high-quality output for projects undertaken by large organizations.
  - Managed and maintained developed projects throughout their lifecycle.
  - Provided guidance and support to junior developers, aiding in their project development.
  - Interacted with clients to comprehend requirements and guarantee project delivery success.

### MAJOR PROJECTS

#### 1. Audit Management System

- Centralized platform for audits, compliance tracking, documentation, and corrective action management
- Automated audit workflows with reminders, escalations, and real-time status tracking
- Implemented role-based access with multi-company and multi-location support
- Built dashboards, analytics, and reports improving audit visibility and governance (*Reduced manual tracking by ~50%*)

#### 2. Visitor Management System

- Secure system for visitor approvals, check-ins/outs, and movement tracking
- Implemented OTP-based verification with image capture for authorized entry
- Developed real-time dashboards and visitor history eliminating manual registers
- Integrated alerts, restricted area monitoring, and escalation workflows (*Reduced entry processing time by 70%*)

#### 3. Cab Requisition System

- Digital system for cab requests, approvals, vendor assignment, and ride tracking
- Automated approval workflows with alerts improving turnaround time
- Integrated vendor management and analytics for cost and performance monitoring
- Built dashboards for real-time transport visibility (*Reduced transport cost by 40%*)

#### 4. Quality Management System

- System for generating and managing secure digital test certificates
- Automated certificate workflows with multi-level approvals and validations
- Implemented digital signatures and QR-based verification
- Built dashboards and ensured tamper-proof records (*Reduced processing effort by 80%*)

#### 5. Helpdesk (Ticketing Tool)

- Centralized platform for managing IT and operational support tickets
- Implemented structured ticket lifecycle with chat, attachments, and collaboration
- Added SLA tracking, escalations, and priority-based workflows
- Built dashboards and audit trails improving resolution efficiency (*Improved resolution time by 60%*)

#### 6. SnapLinkr (Business Card Scanning)

- OCR-based PWA for digitizing and managing business contacts
- Automated data extraction from cards with structured storage
- Built analytics, filters, and event-wise lead grouping
- Integrated WhatsApp/email actions with compliance features (*Improved lead handling by 75%*)

#### 7. PayVion (Payroll & HRMS)

- Comprehensive HRMS and payroll management system
- Integrated biometric attendance with automated payroll processing
- Built leave, reimbursement workflows, and role-based dashboards
- Developed reports and analytics for HR insights (*Reduced payroll effort by 65%*)

#### 8. Blotr (Field Reporting & Monitoring)

- Field reporting system for tracking daily activities and operations
- Built role-based reporting with attachments, timestamps, and validations
- Developed dashboards for real-time monitoring and insights
- Implemented location restrictions and scalable master controls (*Improved operational transparency and accuracy*)
